Mr Otto K. Dorn
Henry George School of Social Science
30 East 29th Street
New York City.

Dear Mr Dorn:

I find I haven't yet answered your friendly letter of February 14th. Naturally, I am interested in, and keep informed of the work at the School - from one source or another. Your continued devotion to the Cause must be what keeps you so young and chipper.

As for Miss Grodman and myself - we are keeping busy with the routine of the hospital, although we do whatever we can, as we can, in behalf of the Cause - both in New York, and elsewhere where good work is being done.

Mr Leaf, whom you mentioned in your letter, is not to be taken "too seriously", as he is like many people who talk more than they do. But I suppose you run across others like him at the School, and know how to "spot" them.

Concerning your request for the lists of names of our previous students - the School has each time, been sent them, so that you no doubt already circularized them more than once. When we get any fresh names, we always send them to the School.

With cordial regards to you and our friends at the School from Miss Grodman and myself, I am

Yours for the Truth that will make Men Free,

S. A. Schneidman
